

Jessica Martin

FULL-STACK SOFTWARE DEVELOPER

Skills Summary

Javascript | HTML5

CSS3 | React

GitHub

Node.js

Express

Q-unit

Jest

Remote Collaboration

Pair-Programming

Work History

Oregon State University

2019 - 2022

Research Assistant

My desire for knowledge allowed me to always be on top of new genetic technologies and made me more efficient in the lab

My ability to come up with creative solutions to problems help saved the lab both time and money

Cascade Valley Cannabis

2020 - 2021

Assistant Grower, Production

Monitored plant development to evaluate growth and quality. Maintain records of growth and production. Report observations and actionable items to Grower

Projects

Forte - Ear Training App

GitHub - Site

- Remotely mob and pair-programmed with a team of three in a five-day sprint.
- used my attention to detail to refactor the code to be cleaner and easier to navigate.

Termagotchi - Terminal Adventure Game

GitHub

- Remotely mob and pair-programmed with a team of four in a five-day sprint.
- used my knowledge of SQL to set up a database, and table relationships to get our game loop to work.
- published an npm package that is publicly available to run our app.

Education

Alchemy Code Lab

2022-2023

Oregon State University

2018 - 2022

B.S. Botany and Plant Pathology

503-476-7970
